A STUDY ON FINANCIAL ANALYSIS OF VENKATA MANOHAR & Co.

Bharani . S
MBA, Sri Muthukumaran Institute of Technology

INTRODUCTION

Financial analysis is one of the most important managerial activities used for evaluating the financial performance and operational efficiency of an organization. It helps management, investors, creditors, and other stakeholders understand the financial condition of a company and make effective business decisions. Financial analysis involves the systematic examination and interpretation of financial statements such as the balance sheet, profit and loss account, and cash flow statement. The process includes the use of analytical techniques such as ratio analysis, comparative statement analysis, trend analysis, working capital analysis, and fund flow analysis.

INDUSTRY PROFILE

The financial services and accounting industry plays a major role in the economic development of a country. The industry provides essential services such as auditing, bookkeeping, taxation, financial consultancy, budgeting, investment planning, and business advisory services to organizations and individuals. Financial and accounting services help businesses maintain proper financial records, comply with government regulations, and improve financial decision-making processes.

LIMITATIONS OF THE STUDY

The present study is based on available financial data and information collected from secondary sources such as financial statements, annual reports, journals, and company records. Therefore, the accuracy of the study depends on the reliability of the available data. The study is limited to selected financial years and may not represent the complete financial performance of the organization over a longer period.

However, the present study effectively highlights the importance of financial analysis in improving financial planning, decision-making, and long-term business sustainability.

COMPANY PROFILE

Venkata Manohar & Co is a professional business organization engaged in providing accounting, auditing, taxation, and financial consultancy services. The company focuses on delivering quality financial solutions to clients while maintaining professional ethics, transparency, and accountability. The organization offers a wide range of services related to bookkeeping, preparation of financial statements, taxation management, auditing support, and business advisory services.

Venkata Manohar & Co operates with the objective of helping businesses achieve financial stability and long-term growth. The organization believes that effective financial planning and proper utilization of resources are essential for business success. Therefore, the company focuses on providing practical financial advice and professional support to clients in various industries.

RESEARCH METHODOLOGY

Research methodology refers to the systematic process used for conducting research and collecting relevant information to achieve the objectives of the study. The present study on the financial analysis of Venkata Manohar & Co is based on a descriptive research design. The study aims to evaluate the financial performance and financial position of the organization using financial data and analytical techniques.

Both primary and secondary data sources are used in the study. Primary data includes interactions with company officials, discussions with finance personnel, and observations related to financial management practices. Secondary data is collected from annual reports, financial statements, journals, books, company records, websites, and other published sources.

The study mainly focuses on analyzing financial statements using various financial tools and techniques such as ratio analysis, comparative statement analysis, trend analysis, and working capital analysis. These tools help evaluate the company's profitability, liquidity, solvency, and operational efficiency.
