The development of medical astrology has been influenced by various factors at different times and in different countries. An ancient art of divination, astrology dates back thousands of years. The astrological art relies on movements of the sun, moon, and planets, as well as the properties of stars in outer space, to predict future events. Physicians would also treat patients surgically, and astrologers, in this case, were the ones who handled the medicine very well. Based on this, they predicted the harm to the country, knew the disease coming through it and treated the medical system accordingly.
