### ABSTRACT

*In astrology one can study a wide variety of categories within oneself. In ancient times, astrology was highly valued for its health benefits. The most prominent of these is medical astrology. Medical astrology has developed in different ways in different countries and influenced by many different factors. Thousands of years ago, astrology was practiced as a means of divination. In astrology, the sun, moon, planets, and outer space stars are used to predict future events. Astrologers were the ones who handled the medicine very well here, while physicians also offered surgical treatment to patients. Based on this, they predicted the harm to the country, knew the disease coming through it and treated the medical system accordingly.*

### I. INTRODUCTION

Generation to generation the genealogical symptoms are carried out biologically. Natal planetary configuration give an impression on the symptoms of the genetical factors brought down to a native as well as the symptoms being carried out to the next generation. Crucial points that are responsible for transmission of genetical factors are lagna, moon and 5th bhava and / or seventh bhavas from thereon of father or mother's birth charts. Astro genetical Influence is the ability of a parental sign to appear as the lagna / chandra lagna in the chart of the child. Such ability depends on the frequency of its appearance as 'crucial point' in the ancestral charts i.e., of parents/grandparents / great grandparents. Influences of transiting planets on the crucial sign at the time of birth of the child also indicate genetical influence. Astrogenetical factor has an embedded influence in any chart to influence the next generation. Nature has shown us in many ways that every living thing is unique.

Although everyone in a family has been following the same diet for many generations, not everyone in the family gets the same disease. This does not mean that diet alone is the root cause of diabetes. Our focus is to establish and confirm the theories concerning diabetes, the impact of the six - eight - twelve houses that cause diabetes, as well as the effect of the planets Venus, Jupiter, Saturn, and

the Moon, which are also believed to be factors causing diabetes. 'Diabetes in Medical Astrology' presents a comprehensive review of diabetic patients being treated and medications available in hospitals and using astrology and the structure of the planets, this study seeks to determine which planets cause diabetes by analyzing their horoscopes, as well as how to protect themselves from this disease using astrology.

### II. TO IDENTIFY CONGENITAL DISEASES

Study of divisional charts, along with Rasi chart give important indications of the diseases and more so of congenital diseases. For a study of the divisional charts –

- 1) Analyze Navamsha and Shashtamsa chart like a normal chart, look at the lagna, lagna lord, the 6th house and its ruler.
- 2) Analyze rasi lagna lord and see how it is placed on the navamsa, shashtamsa or other vargas.
- 3) Analyze karakas, significators of the body organs and see their positions in the Vargas.
- 4) Analyze dasha and bhukti lord and its placement in the Vargas.
- 5) Analyze the Moon and its placement or affliction in the Vargas.

Every human body has some immaturity in their body anatomy. Such immature zones lead to

various diseases. Lesser the immature zones better the health condition. Congenitally immature parts of the body become the principal factors of death in the long run. Congenital immaturity is such a natural phenomenon which can't be resisted by any means. Hence the life is dependent on the planetary influence. The reasons for Congenital immaturity were attributed to the strength of the birth star i.e., natal moon position. Congenital disease is a disease or disorder that is inherited genetically from immediate parents or some grandparents in the family dynasty. This can be either paternal side or maternal side. These symptoms of disease may be controlled in a generation, by medicines / by any other curative methods. Still the recurrence of such symptoms cannot be ruled out in any of the next generations in the family.

3. The two hostile planets are in the same zodiac sign or look at the same zodiac sign, the zodiac sign is to be treated for disease or surgery or injury.
4. Dasa, Buddhi brings disease when traveling in the negative zodiac signs in the

constellation of the planets standing in the star of Andara Nathan.
