ANNOTATION

Since the early stages of the development of the personality society, issues intertwined with the formation of a harmonious generation in the matter of individual and society relations have always been the focus of the attention of the owners of progressive views. From the very first days of our country's independence, attention has been paid to young people with our future. The extensive work carried out in our country plays an important role in educating the future owners in the spirit of loyalty to the ideas of national independence and Motherland.

In this article, the importance of educating students in the spirit of patriotism has been studied pedagogically.

KEYWORDS: *Homeland, patriotism, educational efficiency, civil society, harmonious generation, military education.*

INTRODUCTION

The implementation of the national program of personnel training, we can say without exaggeration, has become the essence, the basis of our far-sighted goal, which consists in the formation of a prosperous, strong democratic state, civil society, ensuring the happiness and well-being of the people living in our generous land.

Youth policy has evolved in connection with radical changes and restructuring processes in society. In the early years of independence, the state policy on youth was directed to the protection of the layers of social need, the restoration of democratic and civil society, the introduction of market relations in the economy, increasing the legal literacy of the population, ensuring the right of young people to education and expanding their opportunities, forming a sense of patriotism in young people.

MAIN PART

The holy hadith, which says "to love the motherland is from the faith", says that the idol of the faith, a pure person with a conscience loves the motherland, protects it from the eyes of strangers, struggles for its survival and survival, for its dignity. These are exactly mentioned as the main signs of patriotism. Also everyone does everything to Homeland fullness and perspective, everything to elyurt's freedom and independence, even sweet soul. These ideas are a worldview integrated into our ancestors.

Today, the development of our independent state is an inseparable link to the young people who are the owners of our future, their outlook, the health and stability of the family environment. It is known that the upbringing of a healthy generation is the age-old dream of all nations and peoples that exist in the world.

One of the spiritual values of great importance for the development of society is the sense of patriotism. Patriotism is a human feeling, which means freedom and prosperity of the motherland, inviolability of its borders, self-sacrifice for the protection of its independence, the strength, knowledge and experience for the sake of honor, glory, happiness of the native people, the most sacred and noble activity in the world, giving all its life. Patriotism means a comprehensive understanding of the essence of the work, rational use of the wealth and dignity that exists in our country, the opportunity for our own strength, the invaluable heritage left by our parents, the restoration of national customs and traditions, the restoration of values, the each other.

Only patriotism in a person who has a sense of vatanism beats. When we say patriotism, it is permissible to understand the following again:

- to know his people, its history well and be proud of him;

-preservation of ancient monuments, unprecedented buildings, material and spiritual heritage created by ancestors and presented to generations;

- to appreciate the beautiful and meaningful traditions, customs and traditions of our people and ancestors, to continue their work;

- wonderful compatriots-in the name of ancestors, to be proud of their glory, creations, to continue their work, to be a worthy successor to them;

- to be proud of such a wonderful people, land, its rich language and culture;

- memorize the greats who fought against the enemy until the last blood remained in his vein, the name of the heroes who died in the battles of the dashing;

- it is to live with high believe in our dear and beautiful homeland, to be faithful to him always.

- patriotism is the responsibility of all of us to look at our work, to preserve the wealth of our homeland in the dark, to add our share to the wealth of our people, to strive for the heights of science and so on.

- striving to maintain peace, stability and tranquility in our native land is a sign of patriotism;

- patriotism is the prioritization of the interests of Homeland, nation in international relations.

Results and discussion

When we are talking about patriotism, there is no way to talk about the high symbols of patriotism, which gave us independence. It is incredibly joyful that the high symbols of patriotism are firmly established in the hearts of our people and young people. "For the citizens of Uzbekistan, the sacred symbols of independence are the state emblem, the state flag, the national anthem. They are proud of the Native Homeland - the Republic of Uzbekistan and nurture a sense of unlimited respect."

Uzbekistan is a country of young people according to its demographic characteristics. The fact is that the problems with young people today are extremely relevant for the prospects of any country. The spiritual perfection of young people is a very broad concept, on the basis of this concept it is important to educate a healthy generation with a healthy worldview. After all, the main goal of education is to live a conscious life in society, to content a high cultural and comfortable environment. "The process of a person's attainment of perfection is complex and takes place under the influence of a person's program in hereditary units, personal enthusiasm and external natural and social environment as well as purposeful educational processes"[1, 37].

The conducted analysis shows that there are opportunities for the realization of the issue of educating students in the educational institution in the spirit of patriotism by integrating the education of patriotism logically into the content of educational and educational work outside the audience and the audience in all social and humanitarian Sciences. In

the hearts of students, botany, zoology, human anatomy, etc.on the subject content of natural science with the aim of deep respect to our history, awaken the feelings of respect and dignity towards our great ancestors he described the concepts of sciences, expressed opinions, ideas about the evolutionary development of the organic world, artificial and natural selection, created doctrines. It is worth noting that a large number of scientists are still continuing the work of such scientists as Abu Rayhon Beruni, Farabi, Abu Ali Ibn Sina in our country today.

The perfection of patriotism is associated with many socio-economic, cultural, ideological, educational factors. This is a complex task that requires a great deal of effort. One of the most important tasks of all professional intellectuals, educators now is the perfection of such qualities as loyalty to the motherland, self-sacrifice in people, especially in young people[2,109].

Education of young people in the military-patriotic spirit is carried out in the following four stages:

a) the first stage (at the age of 3-7 years) is considered the stage at which the initial outlines of the surrounding world, Homeland appear, which includes the formation of love for the native land on the basis of teaching children different lions, melodies and songs in family and preschool institutions, the organization of cartoons and various games, the awareness of the world.

b) at the second stage (at the age of 7-16 years), attention is paid to such noble works as strengthening the love and loyalty of students to the motherland, fulfilling the duty of childhood before the native land with high responsibility, further expanding the positive thoughts in them to our armed forces, raising the prestige of military service, forming young people.

C) the third stage (16-18 years of age) is aimed at ensuring the readiness of spiritual and physical to serve worthy of the motherland and its protection.

g) the fourth stage (18-30 years of age) implies the physical and spiritual ability of young people, leadership skills and individual potential, the improvement of their general and professional skills, their regular work on themselves, the motivation to lead a healthy life and so on.

The system of upbringing of young people in the military-patriotic spirit is a continuous process, consisting of a complex of interrelated political, socio-economic, ideological, cultural and educational activities.

The state is the main institution that provides for the organization of the system of upbringing of young people in the military-patriotic spirit, monitoring of its results.the state organizes the educational process of the younger generation in the

family, pre-school education, general secondary education, vocational training and higher education institutions, during military service, as well as within the bodies of self-government of citizens, various state and non-profit organizations.

As the highest feeling of patriotism, the thinkers of the past noted alokhi, and they themselves remained faithful to him. Information about such disciplines as mathematics, astronomy and trigonometry of encyclopedic scholars as Khorezmi, Beruni, Abul Wafa, Mirzo Ulugbek, Jamshid Koshiy, who have developed from Central Asia, including Movarounnahr are important in educating young people in the spirit of patriotism.

Conclusion and recommendations

Therefore, teachers of exact sciences will benefit from the increased interest of students in mathematics and the upbringing of them in the spirit of patriotism by covering the information on historical materials on the work of movarounnakh scholars, who made a huge contribution to the development of mathematics in the auditorium and in the extracurricular activities. It is also important to compare the works on the decimal, simple and mixed fractions discovered by Khorezmi, Ulugbek, Koshiy when and by whom in Europe they were developed in order to demonstrate that our native land played an important role in the construction of the foundation of the world mathematical science.

The conclusion is that educating our children in the spirit of loyalty to this land, awaken in their hearts a mexru of love for the land of this blessed land is one of the most outstanding qualities of this day, which carries great joy and high responsibility.
